WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

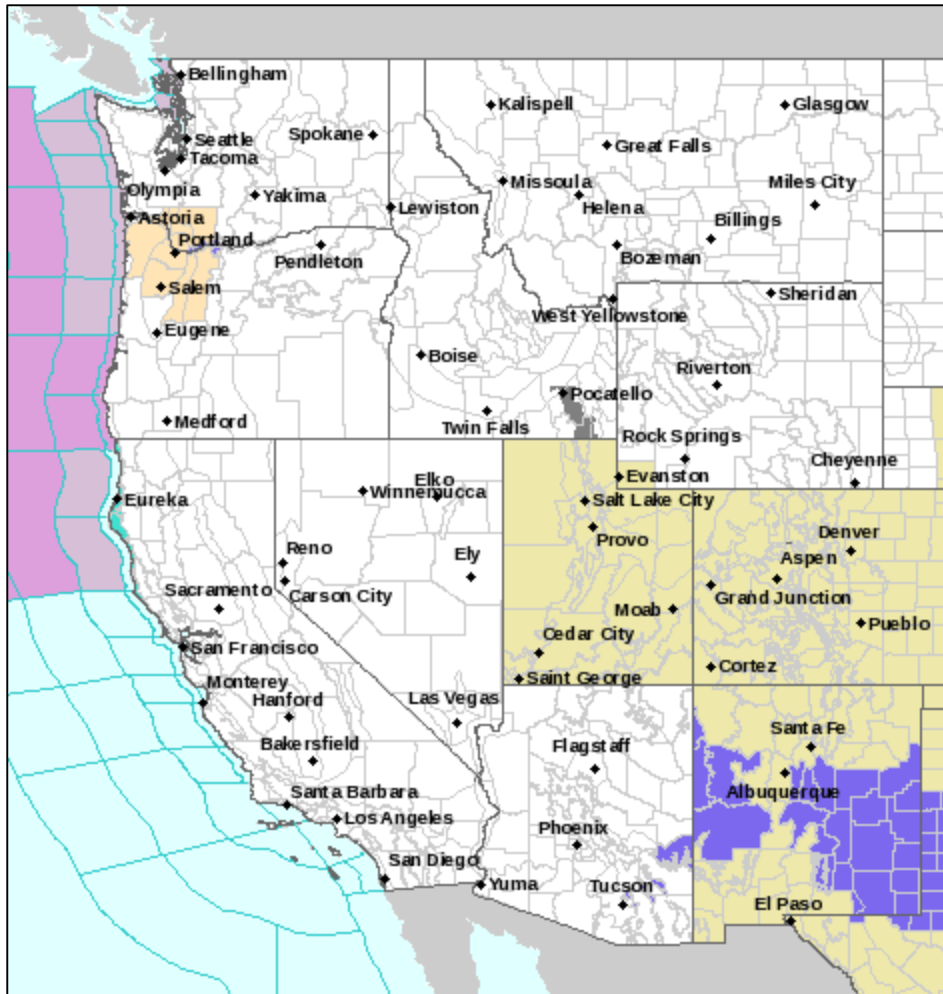

- An unsettled weather pattern will continue over the North Ops region for some time.
- Most of the North Ops region will be dry through Sunday morning under the influence of high pressure.
- However, tonight into Saturday morning a weak trough passing over the NW counties is likely to bring some light precipitation to areas NW of a line from about Shelter Cove to Happy Camp.
- A stronger weather system will arrive Sunday afternoon with more widespread precipitation inland that will linger as showers Monday.
- The rest of next week remains unsettled with a mix of wet and dry periods. Another fairly wet system looks possible next Friday.
- Snow levels will lower to around 4000 ft. at the lowest over the northern areas Monday and again next Friday. Additions to the high country snow pack will continue.
- Some gusty SE to S winds are expected to develop Sunday with that incoming weather system, mostly over the higher terrain.
- During periods of heavier precipitation, debris flows in recent fire scars are still possible. The combination of saturated soils and strong winds could topple trees, especially those that still have quite a few leaves.
- Temperatures will be close to seasonal normals in all areas over the next week with the warmest locations mostly near 60 for highs and mostly mid 40s for lows.

SOUTHERN CALIFORNIA

The last bands of rain will continue to push eastward through the far southeastern deserts this morning, but most of the organized precipitation has ended for the day. There will still be a few light showers possible on the north slopes of the Angeles and San Bernardino N.F. as well as the Grapevine during the morning hours. Little additional rainfall is expected. Light offshore flow and sunny skies will bring a warming trend over the weekend. A storm system moving into the Great Basin may bring stronger offshore winds and areas of light showers next Tuesday. Long range models depict another wet system's arrival around the 17th.

- Mostly sunny skies with temperatures climbing back into the 30s and 40s in the mountains to the lower 70s in the valleys over the weekend.
- Widespread and locally dense fog in the San Joaquin Valley during the night and morning hours through the weekend.
- Local offshore winds of 10-20 mph over Southern CA this weekend, possibly increasing to 25-35 mph next Tuesday.
- Scattered showers possible over Central California next Monday night into Tuesday. Precipitation amounts will likely be under a quarter of an inch.
